

Setting up the Aether Client:

1. Go to <https://files.minecraftforge.net/>
2. DL The Windows installer for "Recommended," run
3. Select "Install Client," leave paths as default unless you're doing something weird.
4. Download the latest Aether II .jar:
<https://minecraft.curseforge.com/projects/the-aether-ii/files>
5. Open the game w/ the forge profile to get it to generate folders, close it.
6. Place it in .minecraft/mods
 - a. C:\Users<user>\AppData\Roaming.minecraft\mods is the default
7. Load up the game one last time and ensure mods are loaded (bottom left corner of title screen)
8. 10. SERVER IP: 73.135.229.185:25566

*SERVER MAX IS 20 PLAYERS (and it might lag at that point)!
